RIGHT TO YOUR DOOR.**

# BAGTHAT

“BagThat” is an e-commerce based software company that provides a unique shopping experience that can be adopted by any online retailer. BagThat provides a platform that allows shoppers to subscribe to a monthly retail service, in which buyers can choose 3-10 items a month from the online retailer of their choosing to wear for the month then return if they did not like it, or purchase it for a discounted price if they would like to keep a certain piece of clothing or accessory. The BagThat software can be purchased by any online retailer, creating a “partnership” between said retailer and BagThat, in which BagThat obtains 10% of each BagThat purchase after the initial buy-in fee.
